LockOne® Positive Locking / Anti-Vibration Fastener

Auveco's **NEW LockOne** is a revolutionary lightweight, positive locking fastener designed to prevent a standard nut from loosening free under vibration. Unlike nuts with nylon or locking compounds, LockOne won't come loose under vibration, and can be reused without applying any hazardous chemical compounds. Save on assembly costs!

No expensive replacement nuts needed! **LockOne** can be used in a wide range of industries such as: electronics, aerospace, telecommunications, automotive, energy, and transportation.

- ✓ Fast & easy to install-no special tools required
- ✓ Corrosion resistant 304 Stainless Steel
- ✓ Reusable, does not degrade with each cycle
- ✓ Vibration-Proof, positive locking force
- ✓ Designed for harsh environments
- ✓ Ideal for weight sensitive applications

Installation is Easy!

Simply load LockOne into the 12-Point socket.

Load the standard nut on top of LockOne.

Tighten to application requirements

If there is a gap between LockOne and the nut, simply hand tighten the LockOne until it is flush with the nut.

LockOne is so easy to use it can also be threaded on manually to existing applications.

LockOne only requires three threads beyond the nut to work.

Thread Size	Auveco Part No.	S	H	W	T	Weight	Unit Pkg.
U.S.S. / Coarse Sizes (in.)							
1/4-20	22866	0.43	0.11	0.03	0.03	0.80 g	10
